

## EDOSOUNDS - U2 ZOO TV PACK AX8 (9.04)

My name is Edo Faiella, I've been playing guitar in U2 tribute bands since 2000, with **Poptarts** ([www.u2poptarts.com](http://www.u2poptarts.com)) and **Achtung Babies** ([www.achtungbabies.it](http://www.achtungbabies.it)).

After several years using a 14U rig with lots of different fx and a 2 amp setup, in 2013 I switched to the **Fractal Audio Axe Fx2** and have been using an Axe Fx2 and a Vox AC30 only ever since.

These **preset packs** are the result of 100's of hours I spent studying U2 and **the Edge's guitar tone** over the years. From pictures and video clips to interviews and articles, I gathered as much information as I possibly could in order to be as much accurate as possible.

I own most of the gear the Edge has used in the past 3 decades to craft his signature sounds, and since I got the Axe Fx 2 I spent quite some time (and I still do today) comparing the Axe Fx models with the original pieces of gear they're based on - from amps to stompboxes to rack processors.

The packs are based on different **U2 tours**. Each tour has a different core tone with different amp settings, different mic's and mic placements, different fx and parameters.

So even if a song appears in more than one pack, the preset will be different as the patches have different settings and the song arrangement / sounds might change from tour to tour.

**All presets are made using scenes:** each song uses 1 preset and up to 6 scenes for different patches within the song.

**AX8 preset packs are optimized for AX8 and use 1 or 2 amp / cab blocks per preset.** Unlike the AXE FX2 packs, all presets for AX8 are center panned, except shimmer which is panned according to the reference recording packs are based on.

**All packs use stock IR's**, don't be afraid to experiment with different 3rd party IR's with different mic placements!

All presets can be used direct to FOH (using output 1, stereo), into real amp (output 2 L, no amp/cab sim).

Note: the "shimmer" is on a parallel path and only goes to output 1.

All expression pedal fx (wah, whammy, shimmer etc) use Ext1.

**All presets are made on an Axe Fx2 MK2, exported and optimized for AX8.**

*Disclaimer: all presets were created using specific guitars with specific pickup combinations and specific cables. Using different instruments might yield different results.*
